DETAILED ACTION

Priority

1. Acknowledgment is made of applicant's claim for foreign priority based on an application filed in Japan on December 27, 2002. Applicant has filed a certified copy of the Japanese application as required by 35 U.S.C. 119(b).
2. There has been an preliminary amendment adding new claims 11 to 21. Now pending are claims 1-21.

Allowable Subject Matter

3. The following is an examiner's statement of reasons for allowance: The prior art (US 2,862,971, US 3,957,978, US 4,692,504, US 4,620,020 , US 3,364,107, CA:72:132860) teaches bisphosphonium salts .

US 2,862,971 and US 3,957,978 teach compounds similar to the ones being claimed in the instant invention. However the 4th position on each of the phosphines is an alkaryl or aryl group and not a hydrogen.

US 4,692,504 teaches compounds similar to the ones taught in the instant invention with an alkyl chain between the two phosphoniums and a counter ion that is preferably bromide. However again there are no hydrogens directly attached to the phosphorus moiety.

US 4,620,020 teaches bisphosphonium salts which are prepared by the reaction of an triorganophosphonium alkylide with copper halide in a solvent followed by the addition of a anion.

Art Unit: 1621

US 3,364,107 teaches compounds similar to the ones taught in the instant invention with an alkyl chain between the two phosphoniums and a counter ion that is bromide or RSO_3^- .

However again there are no hydrogens directly attached to the phosphorus moiety.

The prior art does not anticipate or suggest the instant compounds being claimed wherein one moiety on each phosphorus is a hydrogen.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
